

Modifying a Table

When a table has been selected and the fields are displayed there is the ability to change the field types. This is done by clicking on the Modify button.

Clicking on the Modify button opens a new window. This is shown below:

Name	Type	Not Null	Primary	Default	Collate
AlbumId	INTEGER	Yes	Yes		None
Title	TEXT	Yes	No		None
ArtistId	INTEGER	Yes	No		None

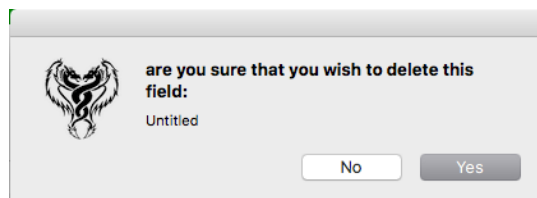

You can modify all of the items shown. You can add or remove fields by clicking on either the plus or minus buttons  .

Clicking on the Plus button () will add a new line as shown below:

AlbumId	INTEGER	Yes	No		None
Untitled	TEXT	No	No		

This will allow you to modify the field as you need.

Clicking on the Minus button () will allow you to delete the highlighted field. You will be presented with a window asking if you wish to delete the field:

Clicking on Yes will delete the fields and clicking on No will not delete the field.

When you are happy with the changes that you have made then click on the Modify Table button and your changes will be implemented.
