SQL

```

CREATE VIEW ExpensesByMonth As
Select
  AllTrans.SECAC SecAc,
  POSTACS.ACNAM1 PostName,
  AllTrans.Yr Yr,
  AllTrans.Mth Mth,
  Total(AllTrans.TSNAME) TotAmt
From
  AllTrans
  Inner Join POSTACS on ( POSTACS.MKEY = AllTrans.SECAC )
Where
  POSTACS.ACTYPE = 'Expense'
Group By
  AllTrans.SECAC,
  AllTrans.Yr,
  AllTrans.Mth

```

SecAc	PostName	Yr	Mth	TotAmt
2	Fees & Charges	2 003	6	(17 16000)

This is the help for the Views tab.

This tab shows all the Views that are registered within the database. Views are created under the SQL or SQL Scripts tabs, not here. This is just a view of all the available views.

Clicking on a View in the View List will display the SQL associated with that view on the top right of the window, and the first 50 rows returned by the view in the bottom right of the window.

In addition, clicking on the View in the View List will copy the SQL statement to the clipboard so that it can be pasted into a SQL text area.
