

Attach Databases

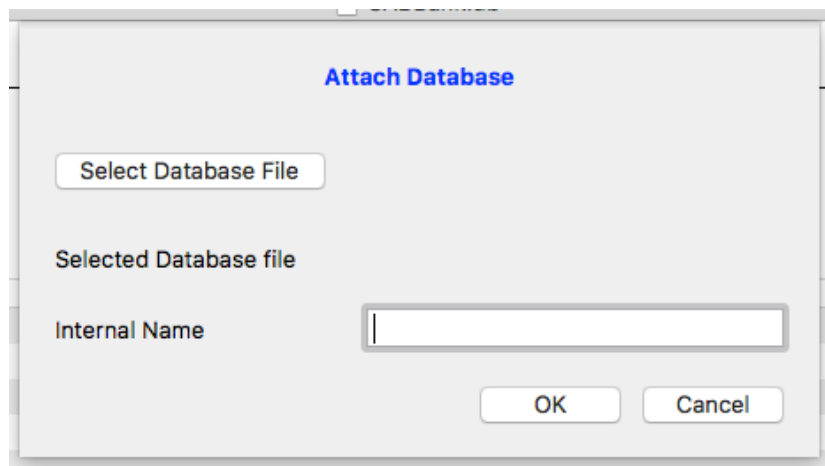

This is the help file for the Attach Databases Tab.

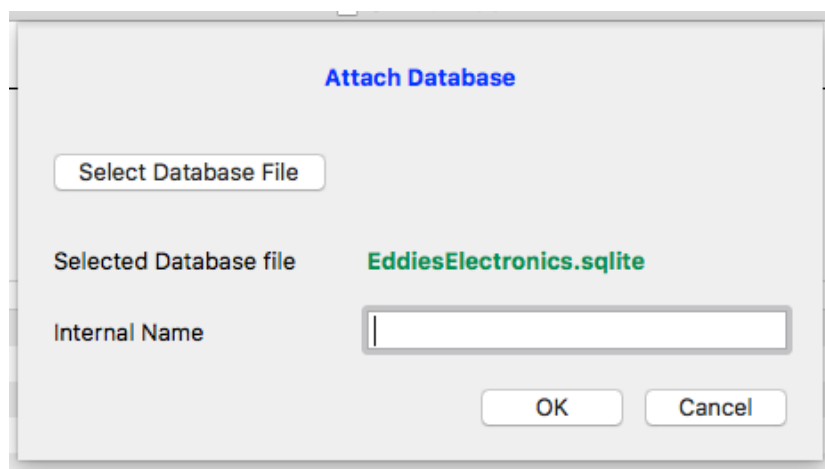

SQLite Control allows you to attach and detach other SQLite Databases at will.

Attach Database

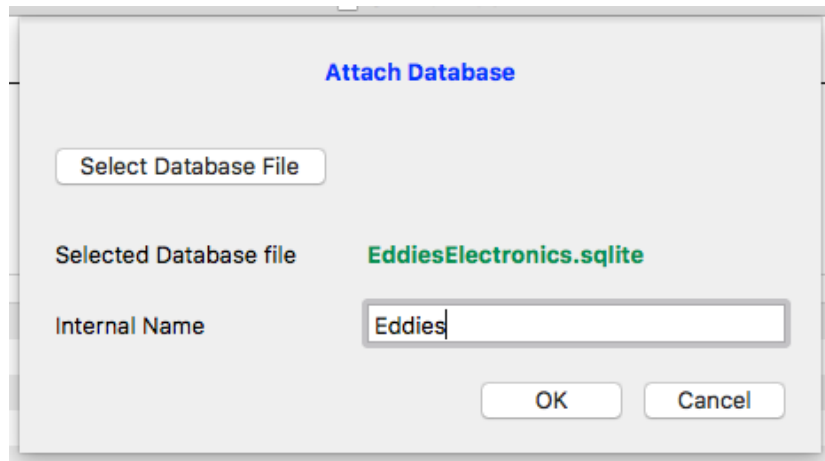

This is done by clicking on the Plus button on the top left hand side of the listbox. This will open a new window:

Click on the Select Database File button to open a standard file open dialog. When a valid SQLite database has been selected the window will look like this:

You can see that we have selected the Eddies Electronics database file to be attached. Now give it an internal name.

Now press the OK button.

The main window will now be updated.

Once you have attached a database then this will be reflected in the SQL tab and the Table/View and Fields lists. This is shown below:

Tables and Views	
UnpostedTrans	View
Variables	Table
YearAverage	View
sqlite_sequence	Table
Eddies.sqlite_master	Table
Eddies.Customers	Table
Eddies.InvoiceItems	Table
Eddies.Invoices	Table
Eddies.Products	Table
Eddies.sqlite_sequence	Table
Fields	
ID	Integer
FirstName	Text
LastName	Text

Detach Database

Click on an attached database that you wish to detach so that it is highlighted in the table. An example is shown below:

+	-
Local Reference	Database File
Eddies	EddiesElectronics.sqlite

Now click on the Minus button on the top left hand side of the table.

The selected database will be detached from the main database.
